Strategy How is the AI strategy contributing to the overall business strategy? 	Opportunity What problem is the AI solution trying to solve?	AI Solution(s) What specific (multimodal) task(s) is the AI designed to accomplish? 
Users/Stakeholders Who needs it? Who benefits? 	Use Cases How do we describe the use case? 	Data/Ecosystem What are the model inputs? 
Success Criteria How is success defined and measured? 	Focus What is the primary focus? (for example, improved productivity, increased efficiency, better decision-making, innovations etc.) 	Policies, Processes, Training What else must be considered, trained, or changed?
